

# POLY COMPOSITE DRUM

## CSF

Steel drums with plastic inner bottles.

### The new Poly Composite drum combines the benefits of two packaging worlds:

- Stability, safety and permeation protection of steel packaging
- The cleanliness, zero corrosion and chemical resistance of plastic packaging
- Particularly suitable for filling goods with a high safety requirement – e.g., highly permeating, aggressive or corrosive substances

### CSF tight-head drum

<b>Nominal volume</b> 202 l / 206 l	<b>Closure</b> 2 x BCS56x4
<b>External height</b> 884 mm	<b>Hazardous goods certification</b> 6HA1/X2/300
<b>External diameter</b> 585 mm	<b>Weight</b> 20.8 – 27.6 kg

### Outer drum body made of steel

#### Steel thickness combinations

1.0/1.0/1.0

1.2/1.2/1.2

#### Lacquer-coated

#### Galvanized steel top plate

### Inner bottle made of plastics

Extrusion blow-moulded, high-purity HD-PE

Weight: 3 kg (206 l) / 6 kg (202 l)

### G3/4 additional bung

G3/4 bung for releasing air trapped between the PE inner bottle and the steel drum
